PROFESSIONAL SUMMARY

DevOps-focused engineer with hands-on experience in containerization, orchestration, and CI/CD automation, proficient in Docker, Kubernetes (HPA, Ingress), and AWS (ECS/Fargate, EC2, ECR). Reduced deployment time by up to 95% through automated GitHub Actions pipelines. Strong foundation in full-stack development (MERN) and REST APIs, applied toward scalable, reliable system deployments.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, EKS, ECS, Fargate, ECR, Lambda, S3, IAM)
Containerization & Orchestration: Docker, Kubernetes (HPA, Ingress)
CI/CD & Infrastructure as Code: GitHub Actions, Terraform, Ansible
Operating Systems: Linux, Bash/Shell Scripting
Backend Development: Node.js, Express.js, Flask, REST APIs, Django, Microservices
Frontend Development: React.js, HTML5, CSS3, Tailwind CSS
Databases: MongoDB, MySQL, SQLite, PostgreSQL
Programming Languages: Python, C++, Java, JavaScript

EDUCATION

Dr. B.C. Roy Engineering College <i>B.Tech in Computer Science and Engineering (Data Science)</i> CGPA: 6.78	Durgapur, West Bengal 2022 – 2026
--	--------------------------------------

PROFESSIONAL EXPERIENCE

Software Engineer Intern <i>Eastern Coalfields Limited (ECL)</i> - Developed and maintained RESTful APIs using Flask, improving backend efficiency and request handling by 30%. - Engineered a leave management system for 100+ users with secure data handling and responsive dashboard management. - Automated deployment workflows using GitHub Actions, reducing manual deployment time by 70%. - Integrated structured logging, debugging workflows, and technical documentation to improve application reliability and maintainability.	Jul 2025 – Aug 2025
---	---------------------

PROJECTS

FlashChat — Real-Time Chat Application | [Link](#)

- Deployed full-stack chat app on Kubernetes (K3s) with multi-replica services; used Redis-backed Socket.IO adapter for horizontally scalable WebSocket communication across pods.
- Built CI/CD pipeline with GitHub Actions to build/push Docker images and deploy to EC2-hosted K3s via SSH with zero-downtime rolling updates.
- Implemented observability stack (Prometheus, Grafana, Loki, Alloy) via Helm for cluster metrics, log aggregation, and pod-level monitoring.

Real-Time Collaborative Coding Platform | [Link](#)

- Enabled real-time collaborative code editing for multiple concurrent users by implementing CRDT-based synchronization with Yjs, React.js, Node.js, and Express.js, eliminating merge conflicts in shared editing sessions.
- Established a scalable, cloud-native deployment by containerizing the application with Docker and deploying it on AWS ECS Fargate, using Amazon ECR for image versioning and lifecycle management.

GenAI Resume Intelligence & Interview Preparation Platform | [Link](#)

- Reduced manual deployment effort by building an automated CI/CD pipeline with GitHub Actions for a Dockerized MERN application, enabling continuous delivery to AWS EC2.
- Delivered AI-driven resume-job matching and skill-gap analysis by integrating the Google Gemini API, generating personalized learning roadmaps based on identified gaps.

PUBLICATIONS

Advancing Lung Cancer Diagnosis and Prognosis

- Accepted at **CICBA-2024** (Paper ID: 203).
- Focused on machine learning-based prediction and analysis for the early detection of lung cancer.

CERTIFICATIONS

NVIDIA GenAI Practice – Hands-on experience with Generative AI concepts and applications.

Spoken Tutorial Certifications (IIT Bombay): HTML, Java, Python, RDBMS, Drupal.
